

SAINT FRANCIS

REHABILITATION AND NURSING CENTER

January 6, 2021

Dear Residents, Families, Guardians and Staff:

We would like to communicate information regarding the upcoming Pfizer-BioNTech COVID-19 Vaccine Clinic as it pertains to those residents and staff that are currently positive with COVID-19. It is recommended that those who test positive for COVID-19 should wait to receive the Vaccine until they have recovered and are not experiencing any symptoms. This recommendation is because it would be difficult to distinguish adverse reaction versus the COVID symptoms. If you have tested positive, we will defer your Vaccination until the next clinic date which is February 2, 2021.

We are relieved that this Vaccine is available to Residents and Staff in Skilled Nursing Centers and we intend to continue to reach out to offer the Vaccine and obtain consent.

Thank you for all of your support during these very difficult months. We are seeing the proverbial light at the end of the tunnel.

We encourage you to visit our website as it is updated daily <https://www.saintfrancisrehab.com/covid-19-vaccine> and if you have questions you can email us at stfrancisevac@stfrancisrehab.com

Sincerely,

Katie Joyce

Katie Joyce, Administrator
