

SAINT FRANCIS

REHABILITATION AND NURSING CENTER

January 12, 2021

To Our Residents, Family Members, and staff:

We are updating you with information regarding COVID-19, testing and the vaccine. Currently we have 14 residents and 9 staff members at Saint Francis Rehabilitation and Nursing Center that have tested positive for COVID-19. We continue 72-hour testing using BinaX rapid test and weekly PCR testing. Saint Francis Rehabilitation and Nursing Center is staying in very close communication with local and state health officials to ensure we are taking all the appropriate steps. The Massachusetts Department of Public Health was on site January 12, 2021 for our Infection Control survey and there were no issues or concerns.

We are thrilled to report that every resident and staff member that elected to receive the vaccination, received their first dose this past Tuesday January 12th.

We will continue to provide you with updates as they become available. **Our website is updated daily or more as needed. Please visit www.saintfrancisrehab.com/coronavirus-community-updates for details.**

Sincerely,

Katie Joyce
